

# 1

## Rectangular Connector Harness

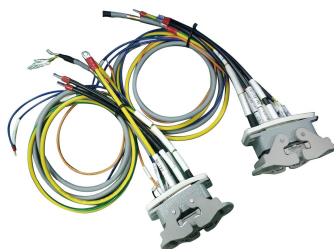

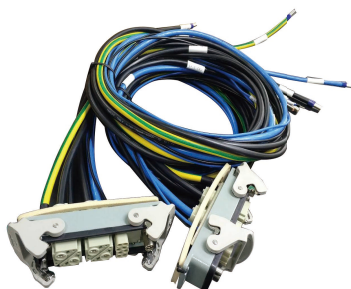

- The module combinations are rich in form, including fiber optic, pneumatic, power, control signal and other modules;
- Cable length can be customized as required;
- Connection method: quick locking, threaded connection;
- Suitable for rail transit, industrial automation, wind power and other industries

# 2

## M Series Harness

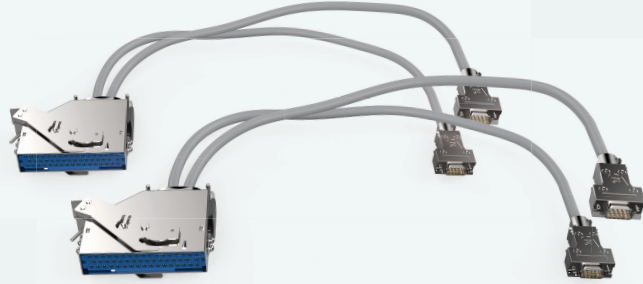

- Provide M12, M23, M40 and other wire harness customization services
- M12 wire harness is suitable for indoor cabinet signal transmission;
- M23 wire harness is suitable for signal and control transmission, such as servo motors and control systems;
- M40 wire harness is suitable for servo motor power transmission

3

### D-sub Harness

- Mainly used for indoor cabinet pc

4

### Circular Connector Harness

- Mainly used for indoor and outdoor power and signal transmission

5

### Fiber Optic Harness

- 62.5/125um, 50/125um and other multi-mode optical fiber harness
- customization services:
- Rich product series: G599, GTC and other optical fiber connector series:  
Rich number of cores: 5-48 cores.
